

PBM HIGH FLOW MANIFOLD

Introducing PBM's new high flow rate manifold for up to 6 boom sections.

This system includes the sensors and actuators needed to produce a consistent flow rate even when you change speed.

Specially designed for high flow applications such as Aqua and Starter systems, the PBM HIGH FLOW MANIFOLD was created as a solution to meet your larger application needs.

Featuring a clean and compact design, this system keeps all your key components in one easily manageable package.

Package Includes:

- In-Line Strainer - Protect your investment & keep maintenance down
- Flow Meter - Accurately record how much product is being applied
- Servo Butterfly Valve - Let the computer adjust the pressure
- Boom Section Valves - Remotely control which boom sections are spraying
- Viton or Buna gaskets & chemical resistant tubing
- 1 1/2" Inlet/Return hose barbs
- Rated up to 150 PSI
- Cables and controller sold separately

Model Number	Valve #	Max GPM
PBM-HIFLOW-3V-RFM-60	3	60
PBM-HIFLOW-4V-RFM-100	4	100
PBM-HIFLOW-5V-RFM-100	5	100
PBM-HIFLOW-6V-RFM-100	6	100
