

Target Pro Spray System

Great For Spraying Suckers

Ultrasonic Sensors!

Target Pro Spray System

The Target Pro Spray System uses an ultrasonic sonar to detect if a tree or object is in its spray path and automatically turn on or off its spray nozzles as it passes the target. This can be used for spraying in-between trees in an orchard, or for only spraying the trunks of trees. The sensors will trigger if

Features:

- *Target Mode - Automatically sprays objects detected in the spray zone*
- *Avoid Mode - Turns off spray when objects are detected in the spray zone*
- *Manual Controls - Allow the operator to manually open the valves*
- *Stainless steel nozzle covers with mounting hardware - left & right*
- *Adjust the delay time at the control box to fine tune the spray application*
- *Ultrasonic sensors are not affected by different lighting conditions*
- *Spray tips sold separately*
- *Includes 25ft of cable for each sensor*
- *80 PSI pressure rating*

Avoid Mode

The nozzle will stay on until an object is detected. Once the object exits the detection zone, the system will wait for the programmable delay, and then re-open the nozzle.

Off / Manual Mode

The sensing system is off. Valves can be turned on with the override/on controls for manual spraying.

Target Mode

The nozzle will turn on when an object is detected. Once the object exits the detection zone, the system will wait for the programmable delay and then close the nozzle.

Manual Controls

This switch can be used to override the sensor controls for manual spraying.
